Testosterone patch	N/A	\$50/\$150	\$600/\$1,800

---

PLEASE NOTE:

These prices are meant to illustrate some typical prescription scenarios. Actual prices may vary (sometimes significantly) based on the actual formulation and dosage being prescribed to a patient.

GoodRx prices change frequently and will likely vary a bit from one fill to another. We used recent pricing available at Vons Pharmacy, which is the most local pharmacy to The Claremont Colleges that provides GoodRx pricing. Medications may be cheaper or more expensive at other pharmacies under GoodRx pricing.

For those with non-SHIP insurance: pricing, coverage, and need for prior authorization will depend on your particular insurance plan. Students are advised to check with their insurance carrier regarding their benefits

\* If SHIP students receive oral estradiol, oral spironolactone, or twice-weekly estradiol patches from the SHS dispensary (not at a pharmacy), they can expect full reimbursement from SHIP for those dispensary charges.
